Protect from frost.

Wash out container and dispose of safely.

To avoid risk to man and the environment, comply with the instructions for use. MAPP No 04661 PCS No 92340

INSTRUCTIONS FOR USE

When to use: **MOSS KILLER** can be applied between March and late September. Treatment is most effective during the Spring and Autumn.

For use on Lawns. Do not apply to lawns sown or turfed less than six months ago. Do not apply under drought conditions, if frost is expected or if the lawn is waterlogged. Do not exceed 310mls per 10m². Do not apply within three days before or after mowing.

How to use: For 10m² of lawn, apply 310mls **MOSS KILLER** mixed with either 9 litres of water with a watering can or 1.5 litres of water with a sprayer. Ensure complete and even coverage. If rain does not fall within 48 hours, water lawn lightly. When moss has turned black, affected area should be raked to remove dead moss.
