

Maxicrop[®]

No.2 Moss Killer & Conditioner

A soluble concentrate containing 17.0% Iron Sulphate and 2% Nitrogen.

This powerful iron based Moss Killer gives a rapid kill of moss and produces a dramatic improvement in turf colour. The added seaweed stimulates tough roots and strong stems to cover the thin weak areas left by dead moss.

DIRECTIONS FOR USE:

Shake before use. Apply 1.5 litres in minimum of 5 litres of water per 100m² (for details see chart on back of label). The grass should be cut three days before treatment and not cut again until at least four days after treatment. Do not apply if rain is imminent, but water in if no rain has fallen within 48 hours. Avoid walking in treated areas until the product has dried. Two weeks after application, scarify vigorously to remove dead moss. Do not apply during drought or freezing conditions. For persistent or heavy moss infestations, a further application may be required after 6 weeks.
